meghachakma.github.io — Agartala, Tripura, India

Professional Summary

Civil Engineering undergraduate with strong academic performance (CGPA: 8.31) and hands-on exposure to **RCC structures, construction practices, and structural design**. Proficient in **AutoCAD, STAAD.Pro, and Revit** with working knowledge of **structural analysis, load calculations, and quantity estimation**. Demonstrated ability to apply engineering concepts in real-world projects and optimize structural systems for **efficiency, safety, and cost-effectiveness**.

Education

B.Tech in Civil Engineering (7th Semester)

NIT Agartala

CGPA: 8.31 SGPA: 8.95

2023 – 2027

Class XII (CBSE)

2023 83.40%

Class X (TBSE)

2021 98.40%

Technical Skills

- **Structural Engineering:** RCC Design, Steel Structures, Structural Analysis, Load Calculations, FEA Basics
- **Design & GIS Software:** AutoCAD, STAAD.Pro, Revit, ArcGIS
- **Construction & Management:** BOQ Preparation, Quantity Surveying, Cost Estimation, Site Execution, Quality Control
- **Analysis Tools:** HEC-RAS, MS Excel (Advanced), MATLAB (Basic), Power BI (Basic)
- **Core Concepts:** Geotechnical Engineering, Fluid Mechanics, Surveying, Construction Planning

Experience

Summer Intern (TULIP Program)

Agartala Smart City Limited (ASCL)

May 2025 – Jul 2025

Agartala

- Collaborated on **3+** Smart City infrastructure projects, optimizing urban development frameworks for municipal planning.
- Conducted rigorous fieldwork and research for **2** major road networks, improving public infrastructure design accuracy.
- Ensured **100%** compliance with ADB and AFD standards across all assigned sustainable urban development projects.
- Executed **10+** comprehensive site surveys, translating real-world data into actionable execution plans for engineering teams.

Winter Intern

Tripura Housing & Construction Board

Dec 2025 – Jan 2026

Agartala

- Analyzed structural integrity for **5** multi-story RCC framed structures, validating reinforcement detailing for beams, columns, and slabs.
- Monitored daily site execution and material handling processes, ensuring construction sequencing adhered to a strict **6-week** phase timeline.
- Enforced **100%** adherence to strict quality control procedures and safety regulations during daily project coordination.
- Interpreted and correlated over **30** complex engineering drawings with on-site implementation, significantly reducing execution discrepancies.

Projects

Disaster-Resistant Low-Cost Rural Housing

Structural Design

- Designed a **cost-effective, disaster-resilient housing system** for rural environments.
- Improved **structural stability and load distribution** using optimized design principles.
- Integrated **sustainable construction practices** with locally available materials.

Structural Optimization of Autonomous Aircraft Component

FEA

- Achieved **10% weight reduction** while maintaining structural integrity.
- Performed **finite element analysis** to validate stress and load conditions.

NITAGenie Campus Automation Platform

Co-Founder & System Architect

- Co-founded a campus automation startup serving **150+ active users**, spearheading product ideation and system architecture.
- Structured the backend relational database using **MySQL** for cab bookings and marketplace listings, ensuring **100% data integrity** with the Django framework.

Relevant Coursework

Structural Analysis, RCC Design, Steel Structures, Geotechnical Engineering, Fluid Mechanics, Surveying, Transportation Engineering, Construction Management

Achievements

- Secured **98.40%** in Class X (Top Academic Performance)
- Maintained consistent academic performance with CGPA **8.31**

Additional Information

Languages: English, Bengali, Hindi, Chakma

Interests: Structural Design, Sustainable Construction, Infrastructure Development
